KAVA Standing evening option, any night: 1–2 kava gummies as wanted. No rotation needed. Take it instead of that night's Late red, or alongside a smaller one. Not before driving; skip when drinking.

RULES

- Two ways to use this sheet: three-dose days take all columns at your own Day / Night / Late times. Two-dose days take Day + Night and skip Late.
- Servings: 3 capsules for Day and Night; Late is 2–3 capsules, only if needed. Keep every dose at least 6 hours from the last one.
- Daily reference: 3 + 3 + 2–3 = 8–9 capsules max, under the 10/day baseline (5 caps × 2 servings) from Speciosa's serving guidance.
- Four-red rotation: with Super Red on Mon & Sat nights, no red repeats within 31 hrs anywhere on this sheet, in any direction, whether or not Late doses are taken.
- Signature Reserve (Friday Day) is the strongest capsule (1.5%+ MIT) — keep the serving standard, don't increase.
- Kava gummy: 1 gummy = 50mg kavalactones. Calm only, no energy side. Nightly use is fine and it doesn't rotate — regular use strengthens it. Kava amplifies kratom, so never stack full servings of both. Label max 5/day; keep to 1–2 on kratom days.
- If effects feel dulled: never dose up to compensate — swap pairings around or take a break day. Regular three-dose days make tolerance creep faster to build and worth watching for.
